

SONG, YONG JIN

Executive Vice President
Head of Strategy & Innovation Division, Chief Strategy Officer
Doosan Enerbility

An Executive Vice President and the Head of the Strategy & Innovation Division of Doosan Enerbility. He is in charge of corporate strategy, corporate R&D and digital innovation of Doosan Enerbility, and is also conducting M&A and cooperation with global companies. Recently, he is actively engaged in Doosan Enerbility's portfolio conversion to clean & eco-friendly energy, new business fields such as recycling & upcycling, additive manufacturing and the application of digital technology in traditional industries. He joined Doosan Enerbility in 2008, where he also performed central purchasing and R&D strategy & planning during his career. He is currently working as the vice president for industry-academia cooperation of the Korean Society of Mechanical Engineers and is participating as a member of the Special Committee on Carbon Neutral Technology under The Presidential Advisory Council on Science and Technology.

Prior to joining Doosan Enerbility, he worked for Samsung Electronics and other Korean consulting company and electronics company. In addition to working as an R&D engineer at electronics companies, he performed strategic planning and participated in cooperation with global companies and M&A.

He received his bachelor's, master's and doctoral degrees from the Department of Metallurgical Engineering at Seoul National University.
